Metal Protector

High-Performance Spray-On Metal Surface Protectant

Metal Protector (AMP) is a high-performance, easy-to-use spray-on product that lubricates, displaces moisture, protects against corrosion and penetrates to free rusty parts.

Metal Protector effectively lubricates moving parts, silencing squeaks without gumming up mechanisms. It displaces moisture from freshwater or saltwater to help prevent corrosion, and it is the product of choice for drying and protecting electrical and ignition systems. Metal Protector penetrates deep through rust and corrosion to restore movement of rusty parts. Metal Protector contains no silicone, and is compatible with plastic, leather, fabric, fishing line and paint.

Cuts through rust & frees frozen components • Helps protect against rust & corrosion, even in salt water • Displaces water • Stops squeaks • Cleans • Sprays into hard-to-reach places • Protects electrical equipment • Lubricates moving parts

Recommendations

Shake well before use. Spray product on area to be treated. For best results, do not wipe off. Film carrier will evaporate, leaving Metal Protector protection in place. Disconnect power source to electrical equipment before spraying.

Availability

AMSOIL Metal Protector is available in 8.75-oz. spray cans.

Available in Canada with stock code CMP
