Synthetic Transmission Fluid

Extreme heat generated when towing and hauling destroys inferior transmission fluids and shortens component life. Heat is especially harmful in today's smaller transmissions that hold less fluid but are required to direct increased power and torque. AMSOIL Signature Series Synthetic ATF is formulated with reserve protection to resist the devastating effects of extreme heat. It is guaranteed for twice the original equipment manufacturer's recommendation for severe service, providing peace of mind that your transmission is protected.

- **Maximum** heat resistance
- **Protects** against harmful sludge
- **Provides** reserve protection in severe service

Synthetic Gear Lube

Too often differentials are out of sight, out of mind. Towing and hauling can increase harmful heat until the gear lube thins, inviting wear and further increasing heat in a cycle known as thermal runaway. The cycle intensifies as heat increases, ultimately leading to poor performance and even failure. AMSOIL Severe Gear® Synthetic Gear Lube guards against thermal runaway, helping differentials provide long, trouble-free life in severe service.

- **Protects** against thermal runaway
- **Resists** harmful deposits
- **Maximum** wear protection

Ea® Oil Filters

Don't sacrifice your diesel engine for a traditional filter. AMSOIL Ea Oil Filters trap and hold more contaminants than traditional filters, keeping them in the filter and out of your engine. Excellent efficiency, less restriction, robust construction.

More Built-in Protection

AMSOIL synthetic diesel oils provide outstanding wear protection, providing the following benefits:

- ✔ **Extended** engine life
- ✔ **Maximum** horsepower
- ✔ **Increased** fuel efficiency
- ✔ **Reduced** oil consumption and downtime
